Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on November 14, 2002 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,170,217 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 29-31, 33-37, 39-40, and 41-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Buecker.

Buecker teaches all the limitations of the above claims including 5-sided chord (12, 14, 16) with web (28), stabilizing or punched out openings (74), stabilizing members or flange (96), single sheet roll formed (column 4, lines 10-21), and a polygonal pentagon shape (see Figure 7) with height (20, 24) greater than width (18).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 32, 38, and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buecker.

Buecker teaches all the limitations of the above claims except for the number of sides being at least 6, the chord being filled with material, or trapezoidal patterns. It would have been obvious for one skilled in the art at the time the invention was made to modify the Buecker invention to include 6 or more sides, a material to fill the chords, and make the openings trapezoidal since it held to be within the skill of a worker in the art to make openings any shape desired by the artisan, to fill the chord to provide greater strength or insulation and to provide as many sides as possible since it is well known to have polygons of many different number of sides, all as a matter of design choice.

Response to Arguments

5. Applicant's arguments filed April 8, 2003 have been fully considered but they are not persuasive. The Examiner maintains that Buecker teaches open (74) and flat web and a plurality of spaced stabilizing members (96). The Applicant argues the size of the holes are for pipes or wires and that the holes are smaller than contemplated with the instant applicant, however the Examiner disagrees and points out that utilities such as

Art Unit: 3637

pipe come in all shapes and sizes from small to large. Thus the size of the holes can vary and are a function of design choice for the given parameters. Thus the material left between the holes can also provide a teaching for a plurality of spaced stabilizing members as well as flanges (96).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
